

## Carbon Trust – ANGLE Incubator

The [Carbon Trust - ANGLE Incubator](#) supports start-up companies developing technologies with real commercial potential that could significantly lower carbon emissions. The objective of the [Incubator](#) is to help qualifying companies become investor-ready, through the provision of up to £60k in incubation and consulting support. So far we provided support to over 25 companies developing a wide range of technologies. These companies raised over £20 million whilst in the [Incubator](#), with a further £15 million being raised on the Alternative Investment Market (AIM).

### Incubator company

ACAL Energy  
AquaEnergy  
Clear Process  
Clearpower Technologies  
CMR Fuel Cells  
Ilika  
Iskra  
Oxford Catalysts  
SAFC  
TMO Biotec  
Walcott Electric Machines  
Oxford Biofuel Cells  
Whitfield Solar  
EKB Technology  
Scotrenewables  
GreenBiologics  
and others.....

### Company focus

Fuel Cells  
Offshore wave energy converter  
CO<sub>2</sub> extraction membrane  
Offshore wave energy converter  
Fuel Cells  
Materials discovery  
Micro wind turbines  
Catalysts  
Fuel Cells  
Biofuel manufacture  
Electric motors  
Fuel Cells  
Solar concentrator  
Reactor technology  
Tidal energy  
Biofuel manufacture

Whether you are a start-up or a spinout (either from academia or a large company), the [Incubator](#) provides a range of commercialisation services including strategic business development consultancy, market and partner research, mentoring for the management team, product development advice, guidance on securing IP rights, support preparing for investor rounds or licence negotiations.

The objective of the [Incubator](#) is to help you build your team, hone your proposition and presentation, build a robust business case and prepare you for success through the next phase of financing for commercial growth.

The [Incubator](#) operates on a virtual basis from ANGLE's offices UK. Selection is competitive but support will accelerate your company along the road to success.
